## What's important to your theater box office?

- A Reliable, Quality Product
- Outstanding Service
- Options in Printing
- Your Theater Projecting A Positive Image

***WW&L delivers all of these important factors.***

### ***Reliability and Quality***

The condition of your tickets plays an important part in how reliably they pass through your C.B.O. printer. Printer problems can stop sales, increase the transaction time, cause long lines, and strain customer relations.

At WW&L, we realize how important your ticket stock is to the overall efficiency of your box office operation. We take pride in ensuring that our ticket stock conforms to the following guidelines:

- Consistent width of the tickets. Variances in widths can cause jamming.
- Position of reader bar or optical mark in the correct position, with no variance from ticket to ticket.
- Ticket bundles being secured with 1" wide polyband strap that will not crimp the stock.
- Quality base stock and consistency of its printing surface, enabling you to imprint a clear readable image and eliminate dust build up.
- Tickets are packaged in heavy, corrugated containers. Your stock comes secured with a special security tape, allowing you to detect readily if the boxes have been opened.
- Guaranteed consecutive numbering for inventory control and quantity verification.

### ***Options In Printing***

Your ticket is your image. Your ticket design and the quality of the printing should project the image of your company and your events in a positive manner. WW&L can help you project the image you're looking for.

Your tickets can be printed using up to 10 colors, using any combination on the front and back. This enables you to print multi-colored logos and design on the front and still be able to recover the printing cost by selling large revenue color ads on the back of the ticket stock.

*We offer a wide variety of sizes.*

2 x 2  $\frac{3}{4}$

3  $\frac{1}{4}$  x 2
